- Professional guidance and mentorship

### FEATURED OPPORTUNITIES

**Business Systems:** At Georgia-Pacific, we develop, run and maintain business systems and applications — from large scale ERPs and other vendor-purchased software packages to custom developed applications. Opportunities may be available in business analysis, project management and application support.

**Software Development:** We enable a competitive advantage when our software solutions solve business problems or provide enhancement and support for a business capability. Development opportunities may be available in SharePoint, mobile, web, database, business intelligence, advanced analytics or traditional desktop software.

**Infrastructure:** We are proud of our secure, reliable and standardized technology infrastructure. Opportunities may be available in end-user devices, networking, server/storage, wireless and security.

QUOTES

“I wake up every morning excited about going to work, because I know what I do matters, and that my work contributes to the success of the company.”

— Matt, Business Intelligence Programmer

“GP is a place where you get to work with superiors as equals. No matter your role, we challenge each others’ ideas to come up with the best solution for the company.”

— David, Software Developer

“Georgia-Pacific is a great place for me because I’m able to do what I love to do every day. The best part of my co-op was learning about new technologies and all the opportunities to grow within the company.”

— Stephen, Programmer Analyst
